

1. Call History

In this page, your personal call log is collected and displayed. Following information is recorded for every call:

- **From** – indicates the originator of the call. If the call was originated by your, your extension and/or IP/SIP trunk will be displayed here.
- **To** – indicates the destination of the call. If you was called, your extension and/or IP/SIP trunk will be displayed here.
- **Account** – DID or SIP trunk used for placing the call.
- **Country** – the country of the called party.
- **Description** – sub-division, operator name, area or identical of the called party.
- **Date/Time** – indicates the start date/time of the call.
- **Charged Time (min/sec)** – indicates the duration of the call.
- **Amount (USD)** – indicates the amount of the call in USD.

To find a specific record in the Call History, you may filter the log records by the following criteria:

- **Last 24 hours**
- **Last Month**
- **Other** – with this option a specific period of time should be indicated.

Additionally it is possible to filter out unsuccessful attempts by ticking the corresponding checkbox.

You may navigate through the log pages by using first, last, previous and next arrows:

, as well as jump to a specific page by indicating the page number and pushing the arrow button:

On the top of the call log an option to send the call log to the email or download it in the .csv format is offered.
